

BandDID

Unmetered USA Direct Inward Dialing (DID) Services

Does your business rely on incoming calls to US telephone numbers? BandTel's BandDID unmetered USA DID service delivers superior quality with unsurpassed simplicity and pricing!

BandDID is an unmetered Direct Inward Dialing (DID) service that provides large volume users of local telephone numbers for incoming calls with a fixed cost solution for services received. Customers can choose from thousands of US rate centers.

If your business has a requirement for a minimum of 100 US DID numbers, BandDID was designed for you! Are you in the call center business, a hosted VoIP services provider, or delivering Communications as a Service (CaaS) to your customers? Do you represent a medium to large enterprise with a need for a local telephone number presence in many US cities? If any of these describe your organization, BandDID cuts through the confusion and delivers quality, price, and the locations you need!

Key Benefits:

BandDID gives you the ability to acquire a block of DID numbers from a single source with a fixed cost covering a broad range of US locations.

- **Simplicity** – No individual market fees or confusing local and long distance pricing models
- **Designed with Volume Users in Mind** – BandDID is offered as a packaged service with aggregate charges rather than a complex set of individual fees.
- **Widespread availability throughout the USA**
- **No channel restrictions** – Some service providers limit the number of concurrent calls. BandTel does not.

BandDID Service

- BandDID service requires a minimum order of 100 US DID numbers.
- Additional DID numbers are available as required, including an additional allocation of 2,000 minutes per DID, with excess minutes billed at an additional nominal fee.
- BandDID service offers 911 emergency calling as an option rather than bundling into the service and requiring it for all numbers, regardless of the need.

BandDID service was created for enterprises that require large volumes of incoming calls to a local telephone number. BandTel was asked for a service that was simple, has excellent quality, has widespread availability, and is priced competitively. BandTel's BandDID delivers!
