

VirtualAnywhere

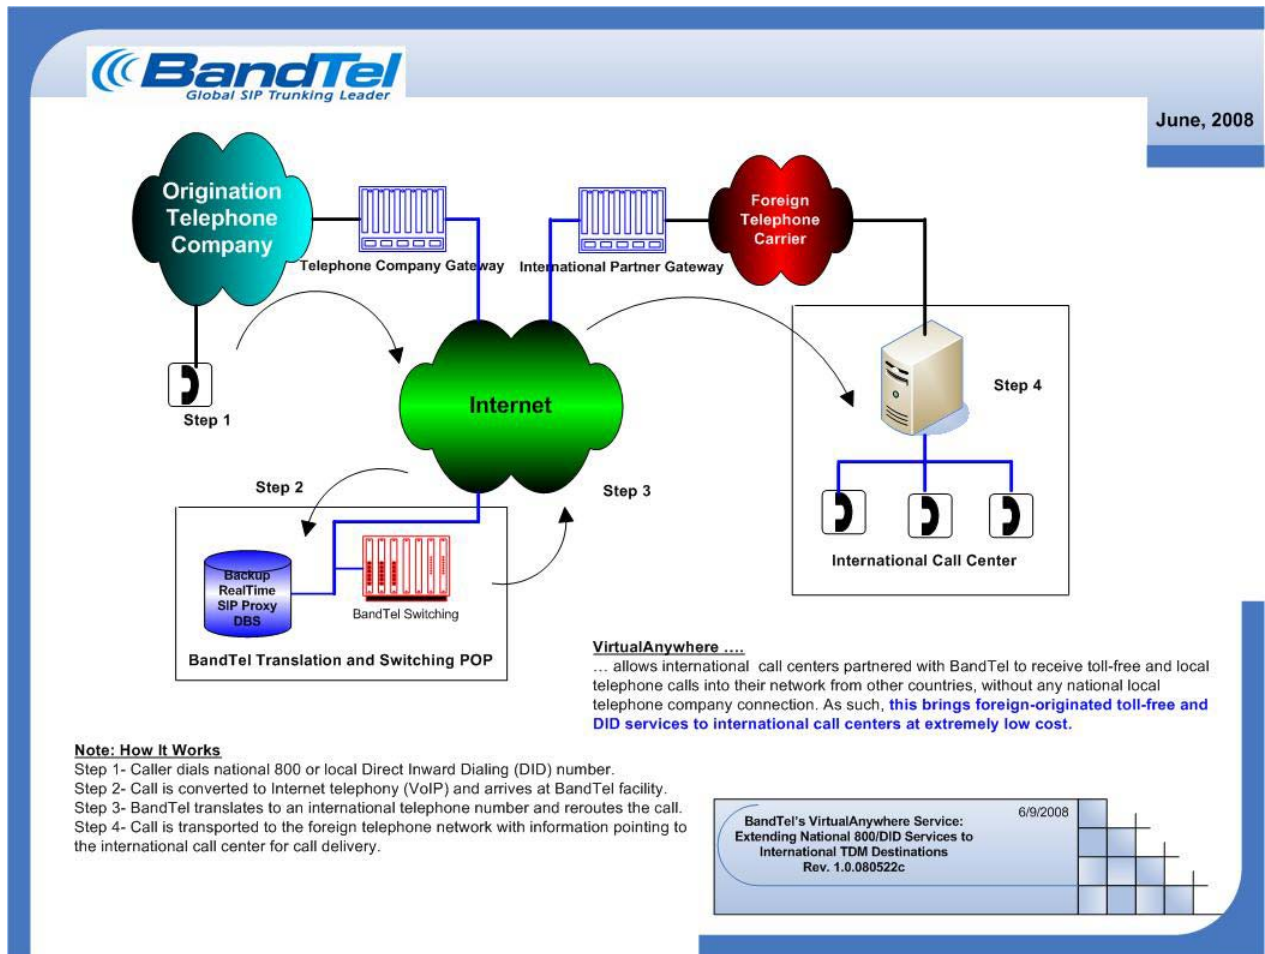

Does your call center receive calls from key international markets where a local presence is desirable? Are the costs killing your margins? BandTel's VirtualAnywhere is the answer that you have been seeking!

Your office locations in many countries around the world can now receive incoming calls to local telephone number in foreign cities or International Toll-free numbers at your desired location. Utilizing BandTel's sophisticated Internet-enabled switching infrastructure, a virtual extension of the foreign local or toll-free telephone number will ring directly at your location in another country. Call centers or other organizations that receive or would like to receive large numbers of telephone calls originating from specific international markets via local telephone or toll-free numbers will find this an attractive alternative to expensive leased line circuits.

Key Benefits:

- Local telephone number or toll-free calls from your target countries can be received anywhere in the world via use of high quality, economical Internet connectivity.
- No changes are required to the contact center communications infrastructure. Existing telephone systems and connectivity are used by VirtualAnywhere.
- Eliminates the need for expensive leased line circuits connecting the foreign location to your offices for receipt of calls originated in that country.
- ***Can be provisioned in a matter of hours.***
- ***Delivers excellent call quality.***
- ***Offers highly attractive per-minute call prices***
- Pricing for VirtualAnywhere is specific to the countries served.

How It Works:

Pricing for VirtualAnywhere is specific to the countries and cities to be served and the quality of service required. BandTel offers Gold, Silver, and Bronze service levels as an added value to our customers.

VirtualAnywhere can be set up in a matter of hours and delivering the services that you need to support your call center location!
